

MATH 156: Precalculus  
Fall 2015  
Quiz Re-take Policy

---

- Any student who scores below 85% is *required* to re-take the quiz. Students with higher scores may re-take the quiz if they chose.
- If a student retakes the quiz, the two scores will be averaged, even if the second score is lower than the first.
- While the second quiz will contain problems from the same sections of the book as the first quiz, **it will not be exactly the same as the first quiz.**
- Any re-take must be completed within a week of taking the first quiz.
- In order to retake the quiz, you must
  - get your graded quiz back and re-work any missed problems **on a separate piece of paper**
  - work a similar problem from the text for each problem missed on the quiz **on a separate piece of paper**
  - schedule a time outside of class (with Jill or Hector) to retake the quiz and bring your graded quiz, the paper with the corrected problems, and the additional problems to this meeting.
